

Downloading Featured Images from the UF/IFAS Photos Database

The IFAS Photo Database has a collection of curated banner images that are optimized for use as featured images in websites and blogs. These images are cropped and downsized to the optimized resolution for the Blogs.ifas platform and cover a wide range of UF/IFAS subject matter. Follow directions below on accessing these ready-to-use banner images.

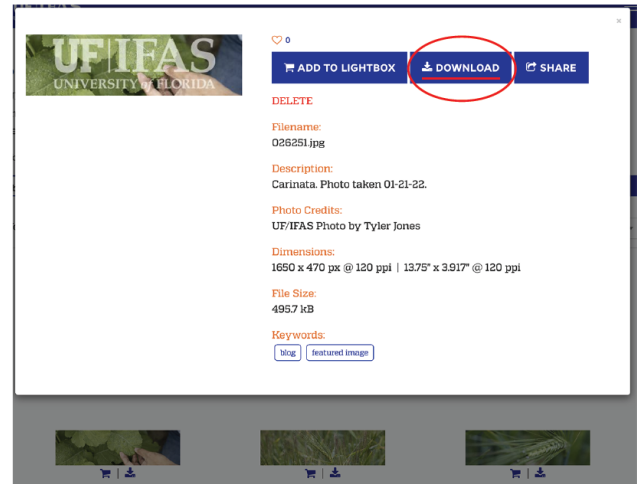

1. Go to the UF/IFAS Photos Database at photos.ifas.ufl.edu.

2. Using the keyword search bar, search either “featured image” or “blog”. Browse until you find your choice image.

3. Click your choice image. Then click Download.

NOTE: If you do not have download access to the Photo Database, click “Request High-Res Photo (Non UF/IFAS Employees)” and an IFAS Photographer will email your file to you.
